

As of November 9th, 2009, the District of Oregon requires Court Reporters to electronically file transcripts of Court proceedings. Now that transcripts of proceedings will be available through PACER, sensitive, private, and personally identifying information such as minor's full names, Social Security and other ID numbers, and financial account information are more available to the general public than ever before. Practicing attorneys within the District are urged to review the new procedures for filing transcripts and to pay special attention to the procedures required for redaction of personal information from transcripts.

Please visit the [E-Filing of Transcripts Page](#) for more information on this policy change.
